

El Agua una Responsabilidad Compartida

Informe N° 2 de la agencia de Desarrollo Mundial del Agua de Naciones Unidas

El agua es uno de los elementos más esenciales para preservar la vida en nuestro planeta. El ser humano ha evolucionado y se ha desarrollado, condicionando sus actividades en función de éste precioso recurso.

En la actualidad, es una percepción generalizada que para el desarrollo económico necesitamos de energía, sin embargo también podemos establecer que ambas actividades son dependientes del recurso agua.

Por ello Naciones Unidas ya en el año 2003, cuando se llevaba a cabo el Tercer foro Mundial sobre el Agua en Kyoto, Japón, introdujo el Primer Informe sobre el Desarrollo del Agua en el Mundo. Dicho informe, con el tiempo, se constituyó en una herramienta educativa, así como una guía para la toma de decisiones.

En **Hidroenergía.net** tenemos el gusto de poner a su disposición la segunda versión de este informe, denominado El Agua, una responsabilidad compartida (Water a shared responsibility), en esta oportunidad su publicación se dió un año después del 4^{to} Foro Mundial del Agua en México (marzo del 2006).
